

A banner image showing a person wearing a blue work shirt and a black glove holding a handheld electronic device. The device screen displays "42dB". The background is a blurred industrial setting with various pipes and equipment.

EMISSIONS ELIMINATION

Emissions elimination is now a primary concern and regulatory priority across industry. Critical environment operations need to ensure regulatory compliance whilst effectively maintaining assets, whether ageing or new, and balancing ever stringent OPEX budgets.

At Score, we've always been in the know with emissions elimination. With our hands-on engineering and technical specialism, centred around ensuring your daily operational excellence, emissions prevention and elimination has long been at the core of our solutions. With decades of industry experience, Score enables you to oversee, prioritise and act on preventing and eliminating emissions on your assets today and in the long term.

We've collaborated closely with our digital partner asset55 to create a comprehensive digital solution for eliminating emissions. This program offers onsite assistance to help you identify, control, and eliminate emissions right at the source. In addition, our exclusive MIDAS® Valve Diagnostics Range of products offer Valve Condition Monitoring to ensure the ongoing safety integrity, environmental protection and efficiency of your process is correctly maintained at all times. Our cutting-edge solutions, from intuitive reporting dashboards to innovative predictive analytics algorithms give you immediate oversight of your asset's performance, trends and priorities. We make maintenance, repair and mitigation decisions easy.

Our suite of decarbonisation tools, including leak surveys, flare vent monitoring and LDAR Programs give you total peace of mind that you have full control of your operations and the ability to not only meet regulatory compliance on emissions prevention and elimination, but to stand out as a leader in sustainable operations management.

With Score, you are backed and supported by our team of skilled emissions consultants, whether you're on the journey to achieve OGMP 2.0 Gold Standard, need to comply with local regulations, or simply need support. Score is ready and available to work with you at every stage, wherever you are in the world, helping you to mitigate and eliminate operational emissions with ease, now and in the long-term.

If it involves emissions elimination, we're here to make things clear.
