## DISCOVER ENERGY SOLUTIONS

- Find solutions for your business challenges in our portfolio of technologies and services.
- All technologies are presented in a standard format, which we call a 'tech page.'
- Get **instant solutions from Steve**, your AI assistant, with up to six tailored recommendations for your challenge.
- Understand the best fit with clear justifications for each suggested solution.

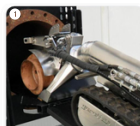

Ask Steve

Hi Francine, I'm Steve, TechnologyCatalogue.com's AI companion. I can search our database of technology solutions for you if you give me a comprehensive description of your challenge below.

**Challenge:** Hi, I have thick sludge at the bottom of my storage tank that I would like to remove. I prefer to have a solution that will not require human entry into the storage tank.

Based on the descriptions provided, Technology 2: Robotic Sludge Removal seems to be the best solution for removing the thick sludge from the bottom of your storage tank without requiring human entry.

The key reasons why Robotic Sludge Removal is the most suitable technology are: [Here Reading...](#)

### Tank & Vessel Cleaning

Safe, industry leading systems for all of your tank cleaning requirements

Industrial Cleaning Robot  
Storage Tanks

### Robotic Sludge Removal

Sludge removal without shutdown

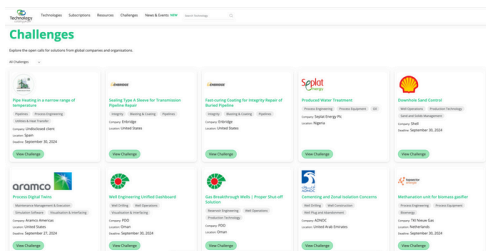

Industrial Cleaning  
Storage Tanks

### Tank Cleaning Robot

Faster tank cleaning with less water

## GET INSPIRED BY THE COMMUNITY

- The platform is powered by our large global community of solution providers and subject matter experts.
- Share your industry challenges publicly or anonymously.
- Receive proposed solutions from within the energy industry as well as other industries.

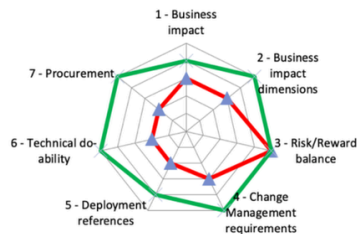

## BENCHMARK YOUR SOLUTIONS

- Our Insights Navigator provides you with powerful data and insights that help you to replicate what other companies are deploying in specific areas.
- Use this data to efficiently build your technology plan. The tool is fully interactive and it will give you a shortlist of technologies.

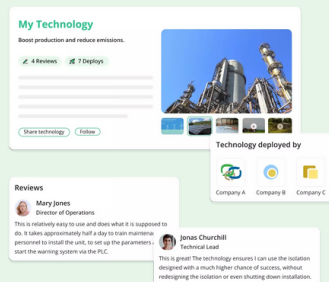

## CONSULTANCY SERVICES

- Depending on your needs, we pull in the right technical and non-technical resources, selected from our extensive network of deployment partners.
- Services available: in-company tech connect events, our workshops: “Technology Deployment: How To Get It Done”, “Build Your Technology Plan”, “Technology Stress Test” and “Technology & Innovation Framework”.

## ENERGY TECHNOLOGY SUPPLIERS:

- Present your technology on a unique technology page for FREE on our Basic plan
- Connect with high-quality leads by receiving inbound messages from potential customers.
- Grow your network by connecting with global organisations, highlighting your products as potential solutions to their challenges.
