

## About SLB

### Our Story

At SLB we create amazing technology that unlocks access to energy for the benefit of all. As innovators, that's been our mission for 100 years. We are facing the world's greatest balancing act — how to simultaneously reduce emissions while meeting the world's growing energy demands. We're working on that answer. Every day, a step closer. Our collective future depends on decarbonizing the fossil fuel industry while innovating across the entire energy landscape. It's what drives us. Ensuring progress for people and the planet, on the journey to net zero and beyond.

For a balanced planet.

## Delivering Digital at Scale with Partnerships

Oil and gas industry has been a lagging adopter in the digital realm. Digital adoption reduces the long and complex planning cycles inherent in the energy industry, and using AI-supported analyses drives performance, improving decision making. SLB is enabling faster decision making by connecting data, people, and ideas to the latest digital technologies from project to enterprise.

We orchestrate a vibrant global ecosystem to drive performance for our customers, our partners, and SLB. Together with Embedded Partners and Suppliers, Alliance and Technology Partners, and Digital Platform Partners, we are driving energy innovation for a balanced planet.
